

Bing

The age of maturity is a concept related to psychology and refers to the point in time when an individual has reached full physical and intellectual maturity ². It is commonly thought of as beginning at age 20 or 21 years ³. However, the legal threshold of adulthood is typically characterized by recognition of control over oneself and one's actions and decisions, and is known as the age of majority ¹. The most common age threshold for the age of majority is 18 years of age, with thresholds ranging from 14 to 21 across nations and between provinces ^{1 4 5}.

I hope this helps. Is there anything else I can help you with?.
